

**IN THE SPECIFICATION**

Please add the following paragraph at page 4 after line 15:

-- Fig. 2B is a partial sectional view of a wheel stud having internal threads. --

Please replace the paragraph beginning at page 5, line 6, with the following amended paragraphs:

Details of the spinning hubcap assembly are best shown in Figs. 2, ~~and 2A~~ and 2B. The hubcap shell **20** is selected to be slightly undersized in comparison with the size of the wheel **90**, i.e., by approximately one inch. For example, a fourteen-inch diameter hubcap would be used on a fifteen-inch diameter wheel.

Please replace the paragraph beginning at page 5, line 11, with the following amended paragraphs:

The wheel **90** is normally mounted on wheel studs **26** which extend from the hub, and the wheel is secured by fastening lug nuts onto the studs **26**. For use with the present invention, the wheel studs **26** are modified by tapping a threaded hole **26a** axially into the ends of the wheel studs **26** to a depth sufficient to receive mounting bolts that secure the bearing assembly to the wheel.
